## **QUELLI DEL FAIALLO - MONDORADIO DX CLUB**

a cura di Salvo Micciché (SWL IT9-4639)

© Quelli del Faiallo & MondoRadio DX Club, 1998 - 2007 – Versione 070213 nuova serie

**CLA** = Clandestine Radio **Pir** = Pirate Radio and Free Banders, **DX** = DX frequency, **Bold** = new, Radio Inattiva (inactive), **DRM** **DRM** = Digital Radio Mondiale, **STFT** = Standard Time and Frequencies Signals, **HAM** = Ham band, **CB** = Citizen Band

La lista di frequenze pubblicata con il nome un po' ambizioso di *Dx-Handbook* è esattamente questo: un manuale.

Un lavoro concepito originariamente da Salvo Micciché come personale ausilio alla sua attività di ascoltatore. La speranza è che possa aiutare anche tutti gli altri appassionati di radioascolto (dxers, SWL, OM, BCL), che spesso lamentano la mancanza di una fonte - concisa e pratica da consultare - con l'indicazione di tutte le stazioni segnalate sulle diverse frequenze. Perché di questo si tratta. Un attento (per quanto possibile) e costante lavoro di compilazione che tiene conto delle segnalazioni dello stesso Salvo, dei suoi contatti dxistici e di altre *mailing list* e bollettini selezionati.

Per rendere ancora più gradevole e informativo il manuale, le frequenze sono state evidenziate in diversi **colori** che consentono di individuare subito stazioni rare o particolari tipologie di trasmissione; e sono state aggiunte informazioni di corredo, come sigle, piccoli repertori e così via.

Nella **prima parte** del volume, insieme alla lista di programmi in lingua italiana, vengono riportate le stazioni ascoltate sulle frequenze comprese tra 0 a 5900 kHz. Il secondo volume riguarda le bande delle broadcast internazionali, dai 49 agli 11 metri. La terza e ultima parte è dedicata ai *reference*, con elenchi di abbreviazioni, codici radioamatoriali, glossari e altro ancora.

La distribuzione e l'impiego di questo manuale sono **gratuiti**, ma i dati sono frutto di osservazioni accurate. Non meno accurate di tante altre pubblicazioni commerciali. Ciò non esclude certamente errori, o informazioni che possono rivelarsi non del tutto aggiornate. Scusandoci per questi errori, invitiamo tutti a **partecipare** alle future revisioni del Dx Handbook segnalando nuove frequenze, variazioni a quelle già pubblicate ed eventuali richieste di ulteriori materiali di corredo.

I **commenti** sono sempre ben accetti, ma conoscendo la realtà terribilmente faziosa del piccolo mondo del radioascolto italiano, vi preghiamo di non esagerare con gli insulti e gli isterismi. Il Dx Handbook non è un manifesto politico, ma una guida fatta con passione e diffusa gratuitamente - e senza secondi fini - tra tutti gli appassionati che vorranno prelevarne una copia.

*Buona lettura.*

\*\*\*

If it looks like a frequencies list, well, that's what the **Dx Handbook** is.

This work was originally meant and prepared by Salvo Micciché as a self-made DXing aid for his activity as a long time radio buff. We now hope others (dxers, SWL, OM, BCL) can use and enjoy it as well. This DC to 30 MegaHertz and beyond list is based on constant and careful personal observations and reports from other DX sources (individual Dxers, *mailing lists* and selected bulletins).

Adding to its value and readability, many frequencies are marked according to a **colour code**, which helps to readily recognize special transmissions or programmes. In its first part, the DX Handbook covers an up-to-date list of Italian language broadcasts and stations from 0 to 5900 kHz. A second part is devoted to the international broadcast bands and many a domestic stations transmitting there. A final section contains a useful reference to amateur codes, abbreviations, glossaries and much more.

A **freely distributed** publication, the DX Handbook is nevertheless serious job. No less true to the radio bands reality than many other commercial lists. That cannot prevent the author from making mistakes, omissions or from not always being up-to-date. We apologize for that: everyone is heartily encouraged to submit her/his **comments, tips, suggestions** or **amendments** for the next edition.

*Enjoy, and keep on DXing.*

*Andrea Lawendel*

Inactive or Planned Service			

-- NBDP (RTTY) Radiotelex. FEC (SITOR-B) mode.

\*\* Note: stations in **italics** broadcast using CW Radiotelegraph. Radiotelex broadcasts are gradually replacing radiotelegraph broadcasts. Thus some radiotelegraph stations listed may already be off the air. This list does not include radiotelegraph stations with operational radiotelex replacement stations.

#### Station List Key:

**Freq:** Frequency in kiloHertz. **Broadcast Times:** "00,04,08,10,12,16,2007" = 0007,0407,0807,1207,1607,2007. "H +" = min past hr. **ID:** B1 Identification Character. (This is the **first character** in Navtex message headers such as "BE16")

**State:** Primary code is 3-letter ITU Country Code (single letter codes replaced by ISO Code). Secondary code included for federative states, dependencies, etc using postal abbreviation or equivalent. **Lat/Long:** Latitude/Longitude in " " " (degrees/minutes/seconds). N/S/E/W specified in header. **Decom.** = Decommissioned.

## Classi di Emissione

### Primo simbolo: Tipo di modulazione

Portante non modulata	N	simultanee o in sequenza	
<b>Portante modulata in ampiezza</b>		<b>Impulsi</b>	
(inclusi casi di subportanti con modulazioni angolari)		Impulsi modulati o non modulati	P
Doppia banda laterale	A	<b>Sequenze di impulsi</b>	
Banda singola portante intera	H	Modulazione di ampiezza	K
Banda singola, portante ridotta o variabile	R	Modulazione in larghezza o durata	L
Banda singola, portante soppressa	J	Modulazione di posizione o fase	M
Bande indipendenti	B	Portante con modulazione angolare durante il periodo degli impulsi	Q
Banda vestigiale	C	Combinazione di vari tipi di impulsi	V
<b>Portante con modulazione angolare</b>		Combinazione di modulazione di ampiezza, angolata e impulsi	W
Modulazione di frequenza	F	Altri casi	X
Modulazione di fase	G		
Portante con modulazione di ampiezza e angolare	D		

### Secondo simbolo: Natura del segnale che modulano la portante

Nessun segnale	0	Due o più canali quantizzati (campionati)	7
Telegrafia a un solo canale	1	Due o più canali di tipo analogico	8
Un solo canale con presenza di un tono	2	Combinazione di tipo quantizzata e analogico	9
Un solo canale analogico	3	Casi non compresi sopra	X

### Terzo simbolo: Tipo di informazione trasmessa

Nessuna informazione	N	Telefonia e radiodiffusione sonora	E
Telegrafia per ricezione auditiva	A	Segnale video televisivo	F
Telegrafia per ricezione automatica	B	Combinazioni di casi precedenti	W
Fac-simile	C	Casi non compresi sopra	X
Trasmissione dati, telemisure e telecomandi	D		

### Esempi:

A3E Radiofonia in AM portante	J3E Radiofonia in SSB	A1A CW, telegrafia ad interruzione di portante
A2A CW Telegrafia con manipolazione di portante modulata da tono audio ridotta		R3E Radiodiff. Banda unica e portante
F3E Radiofonia in modulazione di frequenza (FM)		F1B FSK Frequency Shift Keyng, RTTY
H3E Telefonia banda laterale unica, portante completa		B8E Telefonia bande laterali indipendenti
C3F Televisione immagine sottoportante	F3E Televisione audio	F8E Radiodiffusione stereo con
F3E Telefonia commerciale	F1E Modul. Freq. Voce digitalizzata	F1D Modul. Freq. Voce non digitalizzata

### Larghezza di banda (esempi)

A1A	Telegrafia interruzione di portante	100 Hz	R3E	Radiodiff. b. unica port. ridotta	4 kHz
A2A	Telegrafia manipolazione portante	2 kHz	C3F	Televisione immagine	6.25 MHz
A3E	Telefonia doppia banda	6 kHz	F3E	Televisione suono	750 kHz
H3E	Telefonia banda unica con port.	3 kHz	F8E	Radiodiff. stereo con sottoportante	300 kHz
J3E	Telefonia b. unica port. soppressa	2.7 kHz	F3E	Telefonia commerciale	16 kHz
B8E	Telefonia bande lat. Indipendenti	6 kHz	F3E	Radiodiffusione sonora FM mono	180 kHz
A3E	Radiodiff. doppia banda laterale	8 kHz
